EDUCATION

Computer Systems Engineering, Co-op Option

September 2023-Present

Carleton University, Ottawa, ON

- Third year standing, 10.8/12.0 (A)
- Dean's Honour List, Golden Key International Honour Society, Nemer Family Scholarship
- Expected Graduation Date: April 2028

AVAILABILITY

Available for 12 months beginning January 2026

RELEVANT SKILLS AND EXPERIENCES

Technical Skills

- Proficiency in Python, Java, and C
- Understanding of computer science concepts such as algorithms, data structures, object-oriented programming, and computer architecture
- Experience with Visual Studio Code and Android Studio
- Working knowledge of Linux, Windows and Mac operating systems
- Experience interfacing software with hardware components (i.e. sensors, screens, circuits)
- Experience with version control systems such as Git

Communication Skills

- Fluent in English and B1 Proficiency in French
- Adept in resolving conflicts in a group setting, such as the various group projects I have participated in.
- Experience encouraging others to express different perspectives. As project leader in several courses, such as Communication Skills for Engineers, Data Management and Mechatronics, I was responsible for ensuring that each group member was given the opportunity to express their opinions and unique perspectives.
- Confident in giving presentations in front of large audiences including peers and educators. For example, presentations were given in Communication Skills for Engineers, Data Management and Mechatronics courses.

WORK EXPERIENCE

Software Development Co-op Student

May 2025-August 2025

TechInsights, Ottawa, Ontario

- Contributed to the TechInsights web application by identifying, fixing, and testing UI/UX bugs to improve functionality and user experience.
- Designed and worked on an internal KPI web application using Retool with Auth0 integration for secure SSO authentication, collaborating on front-end design specifications and API integration.
- Gained hands-on experience with Angular, TypeScript, HTML, CSS, Git, and Jira, applying Agile development practices through sprint planning, daily standups, and code reviews.
- Collaborated with cross-functional teams, including QA and UI/UX, to ensure reliable and user-friendly software delivery.

- Strengthened communication and problem-solving skills by working in structured Agile workflows in Scrum framework and incorporating feedback through pull request reviews.

APPLIED PROJECTS

Project Leader

September 2024-December 2024

Prototype Proposal for Communication Skills for Engineers Course

- Course instructor requested innovative prototype proposals from groups in the class
- Researched and designed a proposal that applied several engineering principals
- Cooperated with a group to organize meetings and delegate tasks
- Wrote a technical report consisting of the prototype specifications
- Presented final project to instructor and peers

App Programmer

April 2024-August 2024

Temperature and Humidity Project

- Programmed using Dart in Android Studio
- Coded a web server that displays the temperature and humidity within an environment
- Assembled a circuit that utilizes a temperature and humidity sensor with a Raspberry Pi
- Used Python in Visual Studio Code on the Pi to read sensor data
- Programmed an app in Flutter to display the temperature and humidity detected by the sensor

Project Leader

October 2023-December 2023

Programming Project for Data Management Course

- Programmed using python
- Assisted members in debugging code
- Utilized written communication skills to create a Readme file
- Used leadership skills to ensure deadlines were met
- Collaborated with group members to delegate tasks

Project Leader

October 2023-December 2023

Raspberry Pi Project Proposal for Mechatronics Course

- Conceptualized possible devices and implementations of Raspberry Pi projects
- Performed a weighted trade study to assess various project ideas
- Calculated estimated funds required
- Assessed advantages and disadvantages of several design concepts
- Wrote a report detailing the groups findings
- Presented the groups research to a non-technical audience

Security Programmer

May 2023-June 2023

Password Security Project for High School Programming course

- Identified and explored issues within cybersecurity
- Created a program in Python to resolve key issues within password protection
- Determined whether passwords were in a cracked password database
- Assessed the ethics of accessing a cracked password database
